

Contents

Preface	viii
1 Introduction	1
1.1 Definition of Reliability	2
1.2 Case Study: The <i>Challenger</i> Accident	5
1.3 Case Study: Airline Safety	7
1.4 Text Overview	10
1.5 Further Reading	17
1.6 Exercises	19
2 Coherent Systems Analysis	21
2.1 Block Diagrams and Structure Functions	21
2.2 Minimal Path and Cut Sets	29
2.3 Reliability Functions	34
2.4 System Reliability Bounds	43
2.5 Further Reading	45
2.6 Exercises	47
3 Lifetime Distributions	60
3.1 Continuous Lifetime Distribution Representations	60
3.2 Discrete Lifetime Distribution Representations	69
3.3 Moments and Fractiles	72
3.4 System Lifetime Distributions	75
3.5 Distribution Classes	81
3.6 Further Reading	85
3.7 Exercises	87
4 Parametric Lifetime Models	108
4.1 Parameters	108
4.2 Exponential Distribution	111
4.3 Weibull Distribution	119
4.4 Gamma Distribution	123
4.5 Other Lifetime Distributions	126
4.6 Moment-Ratio Diagrams	132
4.7 Further Reading	135
4.8 Exercises	137

5	Specialized Models	156
5.1	Competing Risks	156
5.2	Mixtures	166
5.3	Accelerated Life Model	170
5.4	Proportional Hazards Model	173
5.5	Further Reading	176
5.6	Exercises	177
6	Repairable Systems	186
6.1	Introduction	187
6.2	Point Processes	189
6.3	Availability	205
6.4	Markov Models	211
6.5	Further Reading	222
6.6	Exercises	224
7	Lifetime Data Analysis	233
7.1	Point Estimation	233
7.2	Interval Estimation	240
7.3	Likelihood Theory	247
7.4	Asymptotic Properties	254
7.5	Censoring	258
7.6	Further Reading	266
7.7	Exercises	267
8	Parametric Estimation for Lifetime Models Without Covariates	284
8.1	Sample Data Sets	284
8.2	Exponential Distribution	286
8.3	Weibull Distribution	312
8.4	Further Reading	328
8.5	Exercises	330
9	Parametric Estimation for Lifetime Models with Covariates	344
9.1	Model Formulation	344
9.2	Accelerated Life Model	346
9.3	Proportional Hazards Model	356
9.4	Further Reading	366
9.5	Exercises	367
10	Nonparametric Methods	374
10.1	Nonrepairable Systems: Raw Data	374
10.2	Nonrepairable Systems: Grouped Data	388
10.3	Repairable Systems: Raw Data	392
10.4	Repairable Systems: Grouped Data	402
10.5	Further Reading	406
10.6	Exercises	409

11 Assessing Model Adequacy	415
11.1 Chi-Square Test	415
11.2 Kolmogorov–Smirnov Test: All Parameters Known	419
11.3 Kolmogorov–Smirnov Test: Estimated Parameters	426
11.4 A Test for Exponentiality	428
11.5 Further Reading	432
11.6 Exercises	433
 Appendix A: Exponential Distribution Properties	 441
Appendix B: Gamma and Incomplete Gamma Functions	450
Appendix C: A Result in Competing Risks Theory	452
Appendix D: Weibull Distribution Initial Parameter Estimates	455
Appendix E: Extreme Value Distribution	459
Appendix F: A Result for Discrete Lifetimes	461
References	463
Index	496
