Instructor: Sarah Day, sday@math.wm.edu

Teaching Assistant:

Office Hours: , and by appointment

Course meeting times: MWF 9-9:50 in Jones 306. Labs will be held Tuesdays, 8:30-9:20 in Jones 302 with the teaching assistant for the course.

Homework: Suggested problems will be given in class and on the class webpage. You are expected to read the text and work (or seriously attempt) the suggested homework problems before attending each class so that you can follow and add to discussions. Some of these problems will be graded. Assignments and due dates will be posted on the course webpage.

Exams and Quizzes: There will be three midterm exams, tentatively scheduled for the following Wednesdays: September 26, October 24, and November 14. During the weeks when there is not an exam, there will be a short quiz given in lab. The lowest quiz grade will be dropped; if you are absent for a quiz, it is your lowest score and will not be made up. No make up exams or quizzes will be given. If you miss an exam or more than one quiz due to documented illness, participation in a university sponsored event, or a family emergency, your final exam score will be used to replace the missing score.

Final Exam: The final exam will be given on Wednesday, December 19, 9:00-12:00 in the lecture room. William and Mary has very strict rules for when a student may take a final exam at a time other than this official time. Failure to take the final exam at the officially scheduled time or to reschedule the exam through the dean’s office will result in a score of “0” for the final exam grade.

Course Grade: 45% of your course grade is determined by the sum of your three midterms, 15% is determined by your quizzes, 15% is determined by graded homework and class participation, and the remaining 25% is determined by the final.

Calculators: Calculators may be used for occasional supplemental work. No calculator that does symbolic manipulations (such as the TI-89) will be allowed on quizzes and exams and it will be considered a violation of the honor code if you use one.

Tutoring: Tutoring is available. Please see me if you’d like help finding a tutor.

Academic Integrity: Each student in this course is expected to abide by the William and Mary Honor Code. All work on the homework, quizzes, and exams should be done alone unless explicitly stated otherwise.
