

MATH 214-02 Foundations of Mathematics

FALL 2023

Instructor: Eric Swartz

Pronouns: he/him/his

E-mail: easwartz@wm.edu

Office: Jones 133

Office Hours: TR 12:30–1:50 PM, 3:30–4 PM

Course Homepage: We will use **Blackboard** as our course homepage.

Important dates: September 11 (Add/drop deadline), October 30 (Withdrawal deadline)

Content: Fundamentals of advanced mathematics: Propositional logic, quantifiers and methods of proof; naive set theory including mathematical induction, relations, orders, functions, and countability.

Goals: This course will give a careful examination of the integers and the real numbers, as a route toward the methods of higher mathematics. A major goal of the course is to develop logical reasoning and mathematical proof writing skills – essential for all higher mathematics studies. The goal of this course is to help you begin to form carefully reasoned, clearly expressed mathematical arguments. Developing clear expression of your reasoning is an absolute must and is as important as arriving at a “correct answer,” and in this course will be valued as such.

Textbook: We will use the course notes I have created for this course. It is available on Blackboard!

Grading:

Homework: 50%

In-Class Participation: 10%

Midterm: 15%

Final: 25%

Final letter grades are assigned using the scale: A 93–100, A- 90–92, B+ 87–89, B 83–86, B- 80–82, C+ 77–79, C 73–76, C- 70–72, D+ 67–69, D 63–66, D- 60–62, F <60

This scale is not rigid! Lower cutoffs are often used.

In-Class Participation: A decent amount of class time will be spent on working on problems (often in groups).

Sometimes others will ask questions or offer up possible solutions to a question. You are encouraged and expected to be critical *in a respectful manner* of the arguments that are presented. For example, rather than stating, “That’s wrong,” (etc.), you could ask a question such as, “Can you explain line xx?” or “How can you conclude A from B?” The goal is to foster a collaborative and supportive environment in the classroom!

Participation grades are based on faithful attendance and participation during lecture as well as actively working and participating during group activities. Attendance and discussion

one-on-one with me during office hours will also be looked on favorably and are an alternative option for students who experience anxiety. The participation grade will (necessarily) be somewhat subjective in the eyes of the instructor, but I *want* everyone to get a perfect (or near perfect) participation score!

Class Absences: If you are forced to miss class, please let me know! Excused absences will not affect your participation grade. **Lecture notes are always posted on Blackboard.** I will work with you as best I can to cover the material that you miss!

Homework Overview: Homework will be assigned during nearly every lecture. The definitive list of assigned homework will be posted on Blackboard. You are strongly encouraged to do all or most of each assignment before the next Tuesday/Thursday. However, correctness is even more critical than promptness. Incorrect proofs will be returned for you to repair, and you will not receive a grade from me until they're completely correct. The final due date for each problem is two weeks after the problem is assigned, unless otherwise noted. Your final homework grade will be based on the number of *completely correct* proofs handed in on time, *regardless of how many incorrect versions you turned in previously*. Partial credit may be given in some circumstances, but most problems will be scored as either 0 or 1!

Don't wait until the day before a problem is due to make your first attempt!

Especially early in the semester, as you are getting used to writing proofs, problems may take multiple tries to get completely correct! Turn in an attempt as soon as possible after it's assigned so that you can get feedback. Late homework will only be accepted under truly extraordinary circumstances (e.g., major surgery). In order to be counted correct, a proof must be written in clear, correct English. This course is about proofs and proof writing, so you should try to express your proofs as clearly as possible!

While you may discuss the problems with your classmates (and you are in fact encouraged to do so!), copying someone else's work is strictly prohibited and will result in scores of zero for *everyone* involved. In particular, you may not use another student's final work as a "model," and you may not allow other students to study your final work. Everyone must hand in final proofs separately. Needless to say, copying or adapting a proof from another source (e.g., book or internet) is strictly prohibited as well. **In particular, the use or incorporation of any AI-generated content (such as from ChatGPT) in assignments is not allowed.** Submitted work may be reviewed, as needed, for AI-generated content.

LaTeX: Your homework assignments must be typeset using LaTeX. Being able to use this software is a useful skill to have, and the programs are available for free, if you so choose. You may also use the online editor available at <https://www.overleaf.com/>. Simply sign up for free, start a new project, and paste the text from "sample.tex" into the source side. It is easy to google commands/techniques that you don't know, but a list of common symbols is available at <http://cklxxx.people.wm.edu/TeX-symbol.pdf>

Homework Policy: PDF files are to be emailed directly to me at easwartz@wm.edu. You should name the file you are turning in starting with "LastnameFirstname" in the filename; for example, `SwartzEric_HWAug31.pdf`. (Name the file whatever you want, but *always* start with "LastnameFirstname"!) **You should combine HW from different assignments into a single file that you turn in on a given day, and you should either omit or mark as graded/correct problems that you have already gotten correct.** HW that is turned in

by 9 AM ET on a given (non-holiday) weekday will be graded that day (or very shortly thereafter). HW turned in at other times may not be graded until the next “batch” (but may be graded sooner, if possible). If HW is due on a given date, I will accept it if it is turned in by 11:59 PM ET that day (but I might not grade it until the next day’s “batch”). **Try to turn in HW by 9 AM ET on weekdays if you can!**

Exam Dates: There will be a midterm on Tuesday, October 10, before Fall Break. The final exam will be comprehensive and will take place Thursday, December 14, from 2 – 5 PM.

Student Accessibility Services: William & Mary accommodates students with disabilities in accordance with federal laws and university policy. Any student who feels they may need an accommodation based on the impact of a learning, psychiatric, physical, or chronic health diagnosis should contact Student Accessibility Services staff at 757-221-2512 or at sas@wm.edu to determine if accommodations are warranted and to obtain an official letter of accommodation. For more information, please see <https://www.wm.edu/sas>

Honor Code: Students are expected to uphold the honor code in this class. Any suspected infraction will be reported. Rest assured, I am older and more experienced than you are. **I will catch you if you cheat!**

Mental and Physical Well Being: William & Mary recognizes that students juggle different responsibilities and can face challenges that make learning difficult. There are many resources available at W&M to help students navigate emotional/psychological, physical/medical, material/accessibility concerns, including:

- For psychological/emotional stress, please consider reaching out to the W&M Counseling Center (757-221-362), 240 Gooch Dr. 2nd floor, <https://www.wm.edu/offices/wellness/counselingcenter/>. Services are free and confidential.
- For physical/medical concerns please consider reaching out to the W&M Health Center at <https://www.wm.edu/offices/wellness/healthcenter/> or 757-221-4386, 240 Gooch Drive.
- If you or someone you know is in need of additional supports or resources, please contact the Dean of Students by submitting a care report (<https://www.wm.edu/offices/deanofstudents/services/caresupportservices/index.php>), by phone at 757-221-2510, or by email at deanofstudents@wm.edu.
- For a list of other resources available to students, see:

As your professor, I also ask you to reach out to me if you are facing challenges inside or outside the classroom; I will guide you as best I can to appropriate resources on campus.
